

<b>Type:</b>	<b>TPC</b>
<b>eDMX</b>	≤ 512 (DMX via eDMX Nodes)
<b>Total</b>	≤ <b>512 channels</b>
<b>Type:</b>	<b>VLC+ (___=50,100,250,500,1000,1500,3000) (e.g. VLC+ 100)</b>
<b>eDMX</b>	≤ ___*512 (e.g. 51,200 channels) (DMX via eDMX Nodes)
<b>Total</b>	≤ ___*512 (e.g. 51,200 channels)

**Note:** The VLC+ channels are used to control a single composition of fixtures. The DVI-D input is local to the VLC+ channels. The TPC can control its channels with complete freedom. The VLC+ and TPC can be programmed and triggered in the same project. A VLC+ can create sufficient traffic to fill a GB network. This setup works for smaller VLC+ only.

- Consult the **Installation Guide** for technical details
- See **General Notes.pdf** for information on cabling types
- **More configurations** are possible to fulfil any project
